INTRODUCTION:

This report has be prepared by the Manitoba Bureau of Statistics (MBS) as part of its economic statistics program. Its purpose is to provide information for Manitoba on the importance and impact of trade at both the interprovincial and international levels.

This publication provides international trade data by country, commodity, and industry. The commodity data in constant 1981 dollars are MBS estimates and are not available from any other source. The information on international trade in current dollars is from Statistics Canada's External Trade Division for which MBS has adjusted the valuation for the major grains and oilseeds to more closely reflect their actual value to Manitoba. In addition, the volume and value of oil exports has been adjusted to balance with interprovincial exports and domestic production levels.

Users should be aware that the export data prior to 1985 is on a "laden" basis. From 1985 forward all export data is on a province of origin basis. In addition, users are cautioned that the import data for all years is on a province of clearance basis. The clearance data represents only imports which are cleared through Manitoba custom ports. Therefore, a significant quantity of imports from other countries are not counted as they are cleared through custom ports in other provinces and then shipped to Manitoba (MBS would count these as interprovincial imports). This implies that trade balances calculated for individual countries would, in all likelihood, overstate Manitoba's actual position.

The Manitoba Bureau of Statistics has available additional detailed information which can be supplied to interested users on a cost recovery basis. For answers to any questions or for further information, please contact Roy Ellis at MBS (204-945-2994).

DATA HIGHLIGHTS:

In 1987, Manitoba's exports to the rest of the world were $2608 million. Agricultural exports were $834 million while non-agricultural exports were $1774 million.

Manitoba's agricultural exports to Japan were $128 million, ranking Japan number one over the United States ($120 million), China ($105 million), and the U.S.S.R. ($96 million). These four countries accounted for 54 percent of Manitoba's agricultural exports in 1987.

The United States dominated the non-agricultural export market purchasing $1394 million from Manitoba in 1987, accounting for 78.6 percent of all non-agricultural exports. In contrast, the next largest non-agricultural export market was Japan which purchased $37.5 million or 2.1 percent of the total.

Total exports to the rest of the world, led by a strong gain of 55.2 percent in the "end products" sector, rose 16.7 percent in 1987. Imports increased by only 1.5 percent to reach of level of $2896 in 1987.

Manitoba 1987 exports, when measured in constant 1981 dollars (constant dollar measures remove the effect of price increases and therefore reflect the volume of trade) grew by 21.2 percent to a level of $2991 million.

Manitoba's imports, measured in constant 1981 dollars, rose 11.7 percent to a level of $2701 million in 1987.

Manitoba's foreign trade is weighted in favour of primary industries. Exports to the rest of the world from primary industries (agriculture, forestry, fishing, hunting and trapping and mining) in 1987 were 36.0 percent of total exports. Exports of manufactured goods $1565 million, accounting for 60.0 percent of all exports. Imports of manufactured goods constituted 93.0 percent of all imports and reached a value $2896 million in 1987.
